

Year 3 Autumn 2

In Geography, we have been looking at the Mediterranean and the countries surrounding it. We have used atlases to find out about countries and continents. As well as this. We have looked at the Mediterranean climate, tourism, agriculture and food. Have a look at the amazing work we have done this term!

Year 3 Autumn 2

DT

This term, whilst learning all about our topic 'The Stone Age', we had lots of fun linking in our Design and Technology lessons to make moveable Stone Age Puppets. Firstly, we conducted market research to see what type of puppets we could make: marionettes, stick puppets, hand puppets, string puppets etc

We then began to design our puppets and piece together how we could make them move before going onto making them. This topic was very fun as we used lots of different skills and even used a saw! The final results were brilliant!
