

Year 6 Website Photos

Science and DT

This half term, Y6 have been conducting investigations into electricity for Science. We have used our knowledge of building circuits to support our DT learning, in which we designed and created our very own steady hand games! We thought of our target audience, designed a game that would appeal to them, then constructed the circuits and baseboards ourselves!

World War 2

This half term, Y6 have been studying World War II through their English, History and PE lessons. We have thoroughly enjoyed researching topics, such as the home front, rationing and evacuation. Additionally, we had an awesome time celebrating 1940's day, where we performed our very own Lindy Hop routines - we even taught some parents our moves!
