Weaving

Gunta Stözl (1897 - 1983) was a German artist who used different colours of fabric to weave patterns in work. This is an example of her work.

Key knowledge to know and use

Different colours and materials can be woven together to create an image.

Layering additional materials on top of weaving can add detail and interest to a piece of weaving.

Textile artists, such as Gunta Stözl, use different fabrics to create artwork that interests others.

Key vocabulary to remember and use in your learning

Word	Definition
fabric	Fabric is the cloth made by weaving natural materials such as cotton or silk. Fabrics can also be produced using man made materials.
layering	To arrange different materials on top of one another for effect.
weaving loom	A device used to weave cloth or fabrics together.
weaving	To repeatedly cross materials together (usually wool) to create a complete piece of fabric.
wool	Yarn is the thread that has been spun and is used for knitting and making cloth.
