

Design Technology Year 1 Autumn: Finger Puppets

Key Knowledge to know and use

- Puppets are dolls that can move in different ways. Some, like the ones you are going to make, fit on the end of your finger. Others are bigger and fit on your whole hand.
- A design is a drawing that shows what something is going to look like. Some designs have writing on them to tell you what something is made of and how it works.
- Puppets need to be colourful and interesting to look at, so your design will need to be colourful and interesting!
- Materials can be joined together in many different ways. Some things stick together better than others. Some ways of joining materials work better than other ways. It's very important to have a go and test how you can fix together your materials when you are making something.
- When you evaluate something, you think about how well you did when doing a job, and how you might change things next time.

Famous Puppets

Hacker and Dodge are on CBeebies and CBBC.

Decoration

Your puppet needs to be colourful and interesting! Draw and label your decoration on your design.
