

# Geography Year 6 Summer —Field study: St. James' Retail Park.

## Key knowledge to know and use

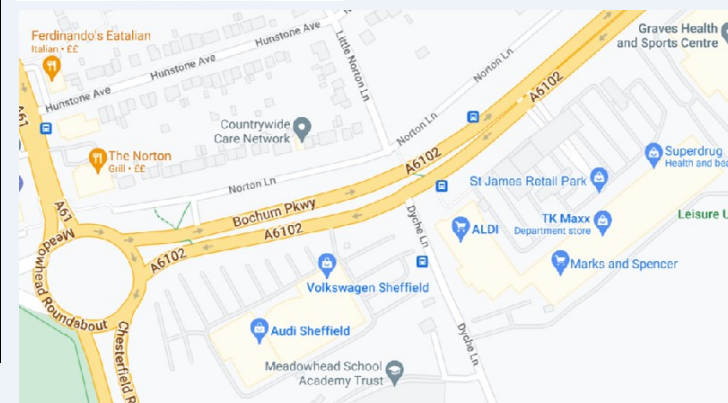

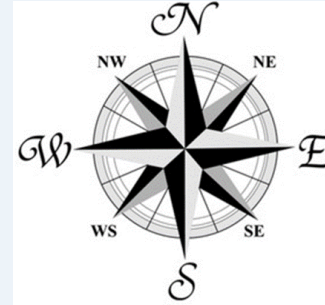

St. James **Retail** Park is a £35 million retail development in the south of Sheffield. It covers 8.23 acres and includes a range of retail and food outlets.

Next door to the retail park is Graves Health and Sports Centre, which reopened in September 2016 after a £16m improvement programme.

The retail park and sports centre have had an **impact** on where people choose to visit and spend their money.

Local residents have raised concerns about increased traffic at Meadowhead roundabout as a result of many more people travelling to the retail

Different types of **survey** questions include open-ended questions, closed-ended questions, rating questions, scale questions, multiple choice questions and demographic questions.

St. James' Retail park has created 250 new jobs and another 125 jobs during the building phase.

St. James' retail park stands on the site of the former Norton College which was demolished in 2017, having been disused for 2 years.

## Key vocabulary to remember and use in your learning

Word	Definition
retail	The activity of selling goods or services to buyers for personal, family or household use.
impact	Having a marked effect or influence on something.
regeneration	The long term upgrading of existing places for urban, rural, industrial and commercial areas.
