

Year 1 Autumn 2 Website photographs

In Design Technology, Y1 was given the task of designing and making sock puppets. For this, children looked at examples of different kinds of puppets before designing and deciding upon a final version of their own. Over a number of weeks, they learned and developed skills such as cutting, joining, sewing and decorating and finally ended up with a sock puppet they were all very proud of!

In Science, Y1 has been investigating the topic 'Animals Including Humans'. Children were tasked with naming and locating parts of their body, while explaining the importance and function of each of the five senses. They also learned to categorise animals according to their features and had to remember how they had done so for subsequent work. Also, children explained and gave examples of carnivores, herbivores and omnivores.
