

Year 4 Autumn 2 Website photographs

Using Computers as an Artist

In Computing, we recapped lots of word processing skills and learnt some new ones, including how to copy and paste images and then crop, rotate and recolour them. We did this on Google Docs, so it was interesting applying skills first learnt on Microsoft Word to this new online tool. We used these skills to create Christmas wrapping paper.

DT

In DT we have been putting our sewing skills to the test, including the use of the whip stitch and running stitch. Then, we researched different types of fabric Christmas tree decorations, before designing and making our very own finished piece, which we evaluated afterwards.
