In Science, Year One has been learning about plants – their properties and what helps them grow.

Everyone planted a runner bean seed and placed it in a translucent plastic cup, covered it with compost then placed it on a windowsill in the sunshine. Every few days, the seed was watered. All of these conditions made sure the runner bean would grow into a healthy and strong plant.

In History, Year One has investigated seaside holidays – past and present.

The similarities and differences between seaside holidays in the Victorian era and today in the twenty-first century have made us realise why this type of holiday was (and still is!) so popular. Some things have changed, yet some have stayed the same. It's been fun learning all about it!
